

JASON LEE

Colorado Springs, CO | Jason.Lee.Cultrans@gmail.com

PROFESSIONAL SUMMARY

Full-stack engineer and product owner with 6+ years of experience in fintech and healthcare. Skilled in building scalable web platforms using React, Node.js, and PostgreSQL. Strong background in system design, API development, and GAAP-compliant financial systems. Known for bridging technical and business teams to deliver user-focused, secure solutions.

WORK EXPERIENCE

FULL-STACK SOFTWARE ENGINEER -> PRODUCT OWNER

Business Warrior / Lehi, UT

JUL/2021 - MAR/2025

- Promoted from engineer to product owner after leading key platform initiatives in fintech lending.
- Designed and shipped a loan servicing platform managing \$4M+ in debt across 4 countries.
- Built GAAP-compliant ledger system from scratch to support thousands of daily users.
- Led globally distributed team in a secure microservice environment using Node.js, React, AWS, and Postgres.
- Integrated third-party banking and payment APIs and delivered analytics dashboards via Looker Studio.

WEB DEVELOPER

Freelance

DEC/2020 - JUN/2021

- Built 8 client websites and web apps using JavaScript, React, and Python, adapting quickly to each project's stack.
- Performed functional, security, and performance testing for production readiness.
- Managed multiple simultaneous projects with consistent on-time delivery.

TECHNICAL CONTENT MANAGER

ManagerPlus by iOffice

NOV/2018 - MAR/2020

- Authored and maintained technical documentation for asset management software, covering user manuals, API guides, and system architecture documents.
- Collaborated with software development teams to ensure accurate and current documentation aligned with the latest software releases.
- Balanced customization and compliance issues in software configuration management practices.

TECHNICAL WRITER

Self Employed Contractor

APR/2016 - NOV/2018

- Authored and edited technical documentation, including user manuals, installation guides, and release notes for software products
- Conducted thorough research on complex technical topics to produce clear and concise documentation
- Translated complex technical concepts into easily understandable language for non-technical audiences
